## Programming Languages

Python    Java    JavaScript    MySQL

## Technical Skills

Programming | Html, CSS, JS | Bootstrap | JQuery | Spring | SpringBoot | Microservices | RestAPI |  
ReactJS | JUnit

## Projects

**Indian NGO's Management System** 03/2024 – 05/2024  
The main objective of this project is to connect the all Non Governmental Organizations that are present in India under one roof. It will make the users to select the specified NGO's to donate the money by applying the filters like StateName and SectorName in which the NGO is currently working. The frontend part was developed by using ReactJs and the backend part was developed by Java along with Spring and SpringBoot. The REST APIs as usually acts as the medium between frontend and backend.

**Cloning of VVIT website** [🔗](#)  
I just developed the clone of my college website (Only frontend part) buy using FrontEnd technologies. It was non responsive in nature. It includes the navigating buttons like admissions, login, placements, examcell,. etc

**Piano Layout** [🔗](#)  
Buy using Html and Css we can create any layouts. Here I've created the Piano layout

## Hobbies

- Doing Meditation    - Practice of Coding    - Reading Books    - Playing Chess
